

# STRUCTURED WAY ADVANCED TASK MANAGER

The screenshot shows a web-based task management application. The main header reads "Company < Back Projects > Software development project > Tasks". On the left, a sidebar menu includes "Projects", "Administrator", "Activity", "Tasks" (selected), "Objects", "Dictionaries", and "User reports". The main content area displays a list of tasks:

- t0-3 Feature Improve usage of label "button\_update" (Closed, Thomas Bryan [04/11/2014 07:57 – 04/11/2014 10:57], 11 months ago)

# ADVANCED FILTER

The screenshot shows a mobile application interface for managing tasks. At the top, there is a header bar with the following elements from left to right: 'Carrier' with signal strength, a menu icon, a 'Back' button, the path 'Projects > Helpdesk > Tasks', a document icon with '0 / 4', a bell icon with '3', and a user profile 'Demo User'. The time '6:24 PM' and battery level '100%' are also displayed.

The main content area is titled 'Advanced Filter' and contains the following sections:

- Simple**: A blue section containing a search bar with placeholder text 'Search...' and a red 'X' button.
- Props**: A grey section.
- Complex**: A green section where filters are being built. It includes a '+' button, an 'AND' dropdown with a '+' button, an 'Executors' dropdown with a '+' button, an 'Executor' dropdown with a '+' button, and a 'Current role' dropdown set to 'Manager' with a '=' sign. There is also a 'Clear' button.
- Favorites**: An orange section.
- Sorting**: A red section.

At the bottom of the screen, there are several navigation and action buttons: '+ Create task', 'Reports', 'Cards', 'Subscribe', and a refresh/circular arrow icon. There are also left and right arrows for navigating through the interface.
